

WIHA Ceramic

The Wiha Ceramic precision screwdrivers with blades made of hightech zirconium ceramic are the perfect tools for all applications in clean rooms and for delicate electrostatic components. In these areas there are high requirements in terms of eddy-current losses.

The ceramic blades and handles are completely antimagnetic and anti-static. This is a fundamental requirement for working with highly sensitive components, such as capacitors, solenoids and various resistances. The ceramic blades are resistant to mechanical wear, acid corrosion and thermal shock stress. Wiha Ceramic screwdrivers are available with slotted and Phillips tips, as well as in a set.

The ceramic blade and handle are completely anti-magnetic and anti-static.

With centring head and quick-turning zone for optimum handling.

Ceramic Slotted Screwdrivers

270 Series - Ceramic Slotted Screwdrivers

Non-static adjustment tool with ceramic blade.

Blade: Made of high-quality special ceramic, anti-static/anti-magnetic.

Handle: Wiha Proturm® Precision handle with rotating cap, anti-static/anti-magnetic.

Application: Specially designed for tuning and adjusting high frequency devices, suited to cleanrooms.
